

MetaTrader Terminal Setting

Go to Tools → Options → Expert Advisors → Allow WebRequest for Listed URL

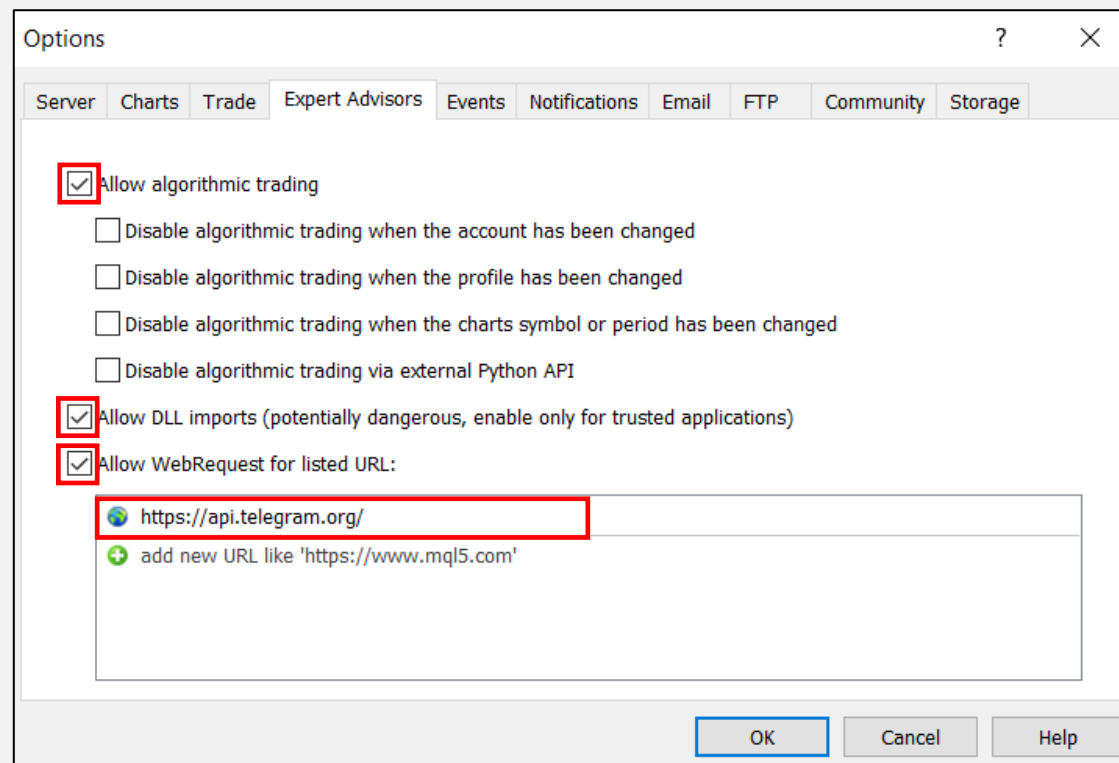

Open Tools → Options → Expert Advisors → “Tick” as below

- Allow automated trading / Allow algorithmic trading
- Allow DLL imports
- Allow WebRequest for listed URL

And then go to **Allow WebRequest for listed URL:** and add Telegram API

Telegram API : <https://api.telegram.org/>

Click **OK, Done (One-Time Only)**

Note:

1. If you received a Failed/Error, check at the **Experts / Journal (at bottom side)** to identify the Errors.
2. By right, if you have set everything up, you shall be able to use and run our software.
