

Pre-requisites

Note: Perform the Pre-Requisites (If require) after you have setup the Metatrader Terminal Setting

Q1 : What do we need to prepare prior to check the Pre-requisites?

A1 : The Only thing you need to prepare is to set up the Metatrader Terminal Setting

Q2 : Do we have to perform the Pre-requisite Check?

A2 : Not necessarily, If you are running **Window 7 & Window 8**, you shall perform the Pre-requisites Check as we know both OS versions are no longer supported Web Request Function.

Q3 : How do we know that the Web Request Function working?

A3 : Once you have Setup the **Metatrader Terminal Setting** and you are attached Expert Advisor (EA) to the Chart, you shall see **Webrequest Checked OK** Alert's.

Note :

Once you have confirmed received **Webrequest Checked OK** Alert's, you shall be able to use Our Software.

Q4 : I received Webrequest Checked OK BUT **How do we know the Telegram Copier is Working?**

A4 : This is the Pre-requisites is all about, by right if you have no problem with Web request Functions, you shall be able to use it BUT sometimes the Synchronization interference will cause the Telegram Copier will not working properly. How to solve it? **Proceed Point No 2.**

Q5 : What do we need to prepare to check **the Telegram Copier EA?**

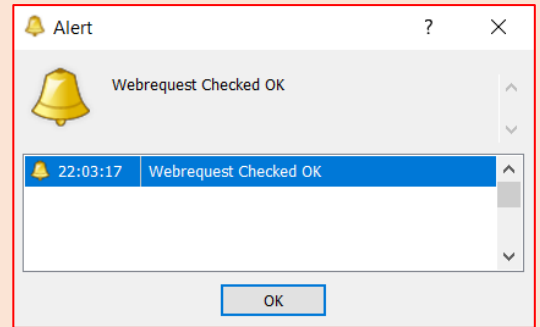

A5 : Yes, you have to create your own Telegram Channel and input the Telegram Channel Link in the EA settings and Click OK. How to check it? **Proceed Point No 1.**

1. Pre-requisite to check the EA compatibility and Synchronization with the Current VPS/PC

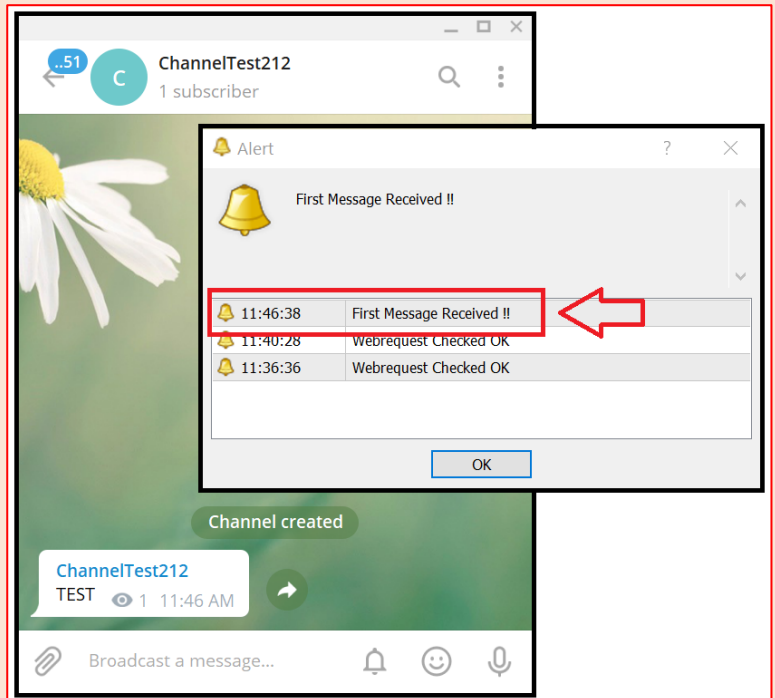

1a. How to Check the compatibility of Telegram Copier EA in your Machine (PC / VPS / Workstation etc)

- When you have received the **Webrequest Checked OK** Alert's

1b. How to Check if the Telegram Copier is working or not?

- Create your own Telegram Channel and Input to the EA setting. Once EA successful attached to the Chart (you shall see the interface etc), type any message in your Telegram Channel.
- If you have received **First message Received !!** that is indicate the Telegram Copier EA is working in your Current Window.
- You can close the Pre-requisites file and proceed to Setup the Telegram Copier EA

+++++
Congratulation!!! First Message Received!
Latest Message On : 2020.12.31 20:00
 +++++

- If you **NOT received any Alert** (after type any new message) in Telegram Channel, **proceed to No 2.**

2. To check the time Synchronization of your Current Window

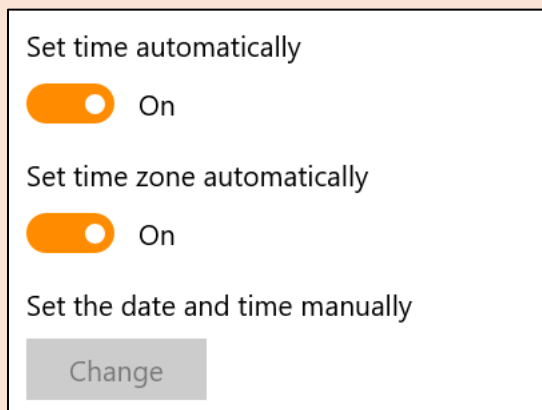

If you have not received **First message Received !!** When type new message in Telegram Channel.

- You have to set time automatically, Set time zone automatically.
- You have Synchronize your Clock.

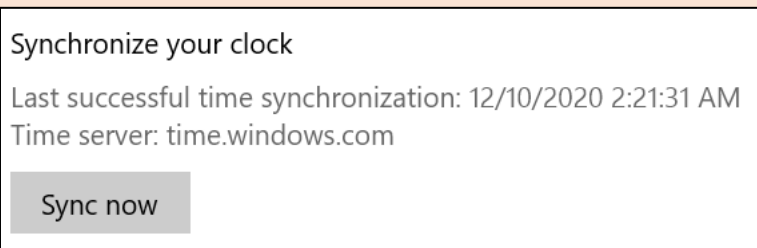

2a. Time sync - you need to set Date & Time

Set time automatically  On

Set time zone automatically  On

2b. Synchronize your Clock

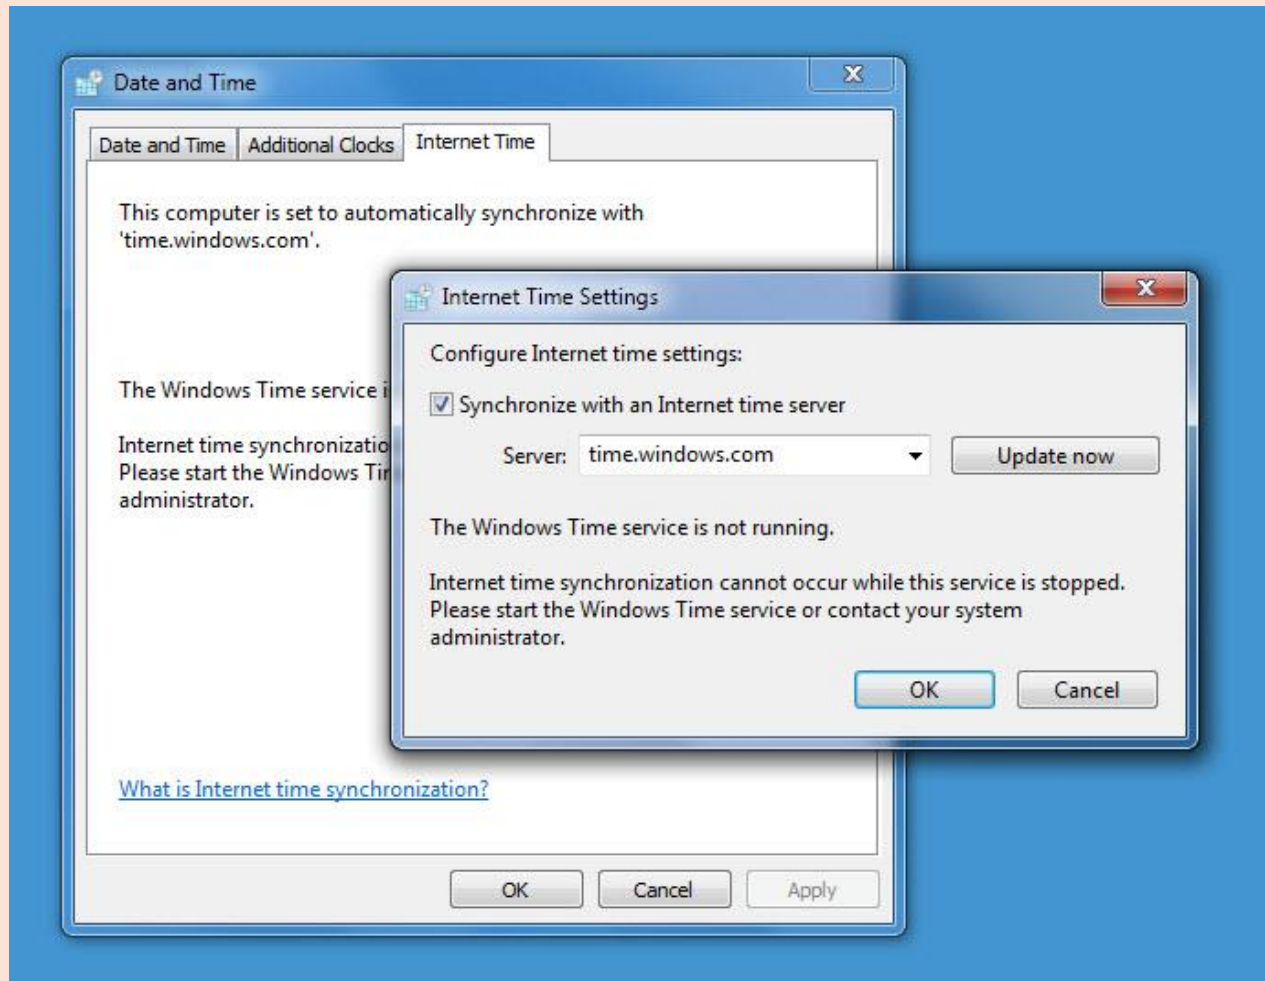

Make sure that the Last successful time Synchronization is current Time
Time server: time.windows.com

Or ELSE → just click Sync now and **make sure it is not Failed!**

If you have successful time sync, **repeat the point no 1b** until you received the First Message Received Alert.

If you use Other than window 10, you can check as below

Perform the Following Steps:

- Go to **Date and Time**
- Go to **Internet Time Tab**
- Go to **Internet Time Settings** and make the settings as above photo
- Tick the **Synchronize with an Internet time server**
- Click **Update now**
- Click **OK**

For more troubleshooting: Go to this link → [Click Here](#)

NOTE:

If you have successful time sync, **repeat the point no 1b.** Until you received the First Message Received Alert.
